

# Presentation Outline

## ***I Never Thought Addiction Could Happen to Me-The 3 secret Addictions that are Destroying the Lives of College Students and What to do About it!***

Presented by Loree Taylor Jordan

*"WOW! Until hearing Loree, I never realized how a student could seem totally fine on the outside but on the inside they're experiencing an addictive behavior. Loree has a message that both students and staff must hear and could help to save lives!"*

*James Malinchak, "Two-Time College Speaker of the Year! Co-Author, Chicken Soup for the College Soul*

I am honored to present two special interactive 45 to 90 min. programs with Q & A personally designed for both your administrative faculty and students. I would like to be an outside voice to educate, empower and inspire your faculty and students. Both of these presentations will incorporate personal compelling stories of the long-term effects of drug addiction on a former college athlete, a sports betters gambling addiction from college to jail my own personal story of food addiction and the *power of recovery*.

Morning session (45 to 90 min)

Your administrative faculty will learn:

- Understanding the disease model of addiction vs. power of choice  
(choosing to bet on sports, binge drink or use drugs)
- Recognizing the secret signs of addictive behavior in students
- Suggested strategies for implementing a non-judgmental & non-threatening accountability system to avoid enabling a student in their addiction

Evening session (45 to 90 min)

Your students will learn:

- Understanding the disease model of addiction vs. going along with the crowd
- Recognizing the signs of addictive behavior in themselves or fellow students
- How to best utilize campus resources to find and to get help

I would like to conduct an informal on campus walk around to interview students for pre-program information and assess the available student resources. This would enable me to customize my presentation to the specific needs of your university.

I will make myself available for faculty and students after both of these presentations to autograph copies of my book *I Never Thought Addiction Could Happen to Me*.

*“Loree has the heart of a genuine healer. She’s a person who really touches others, who motivates, inspires and makes them laugh-the greatest medicine of all.”*

*Terri Bellairs-Seminar participant*
